Release Date: March 16, 2024

Release Version: 24.03

Introduction

This document describes the features and functionality of this release of FAMIS 360. Enhancements include issue fixes, Logbook, and Purchase Order enhancements.

After the deprecation of Internet Explorer in June 2022, we no longer support the browser for running FAMIS 360. We recommend using Microsoft Edge instead.

The features highlighted below are now available. For more information or to learn how your organization can start using these features, please contact our sales team at 800-774-7622 or contact your account executive.

Improvements and issues fixed

Component	Summary	Reference #
Work Order	The My Company Only filter on the Find Request page now accurately shows work orders based on the Default Contact's company or common area designation, rather than the company of the assigned user. This ensures users see all relevant work orders they or their company colleagues create, irrespective of the assignee's company. This update corrects a previously unidentified issue and streamlines company-specific work order searches in FAMIS.	60106
Auditing	The NOT NULL constraint has been added to the lgj_updated_by_id column in the lgb_emp_rgn_prop table, ensuring data integrity and consistency in the user audit logs.	60736
Utilities	The Meter Site Allocations feature now accurately displays only the credit account strings associated with the selected Account Group . This fix ensures that users see a distinct and relevant credit account string during Meter Site allocation, eliminating the confusion of multiple account strings from various groups.	52514

Component	Summary	Reference #
NPFA	FAMIS now validates account strings against the billing hierarchy only when relevant entities are modified. The system will prompt for account string verification exclusively when users update Request Type, Subtype , or other billing-related fields during work order reclassification. This targeted validation prevents unnecessary prompts and streamlines the update process.	47395
