

General Navigation - Viewing Object Count Totals

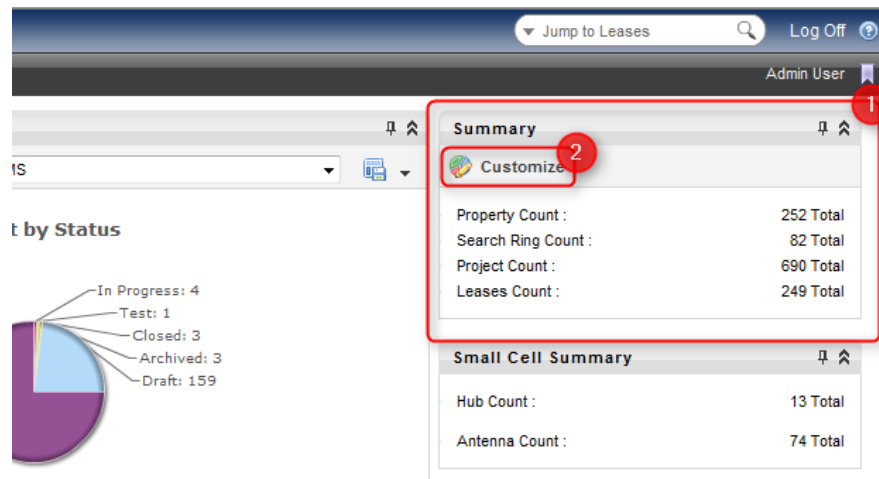

Question:

How do I see how many objects I have in Siterrra, such as Sites, Search Rings, Projects, or Leases?

Answer:

You can customize the Summary (1) section on your Siterrra user homepage to provide a quick overview of the number of active Sites, Search Rings, Projects, and Leases in your portfolio.

This section is specific to each user account, so any changes that are made will not affect other users' Summary section. To make changes, select the "Customize" (2) button. Make sure you are on My Siterrra > Home, and see the section below:

Note: Summary counts are updated during scheduled search data update, and may take up to 2 hours to sync.

Clicking Customize will populate a new window with options to select or exclude count types and rearrange the order they appear in.

To include an object count into the Summary, select the checkbox to the left of the count name (3). If there is not check in the box, the item will not display. You can also move the count type up or down in the list by selecting the green arrows (4) on the page. This allows you to reorganize them based on priority.

☐ Select All

☒	Property Count	↑ ↓	Text
☒	Search Ring Count	↑ ↓	Text
☒	Project Count	↑ ↓	Text
☒	Leases Count	↑ ↓	Text

Running a Business Intelligence Object Count Report:

Business Intelligence reporting will provide the most powerful solution for object counting within Siterra, offering customized reports for Sites, Search Rings, Projects, Leases and several other metrics. You can run a report off the entire portfolio, or select individual Organizational Units for your reports. As with all BI Reports, this data may take up to two hours to sync changes.

From the Business Intelligence main page, navigate into Siterra Reports and the Administrative folder (1). The Object Count report (2) will open a prompt to allow you to fine tune the report results.

Object Count
Owner: Administrator
Modified: 1/21/13 2:42:44 AM
A summary report that counts multiple object types (Assets, Events, Incidents, Leases, Projects, Search Rings, and Sites) by Organization Unit(s). Useful for obtaining a high-level view of an entire portfolio.
